

## Market Timing For Short Term Income & Long Term Wealth

*A Three Day Course on Low Risk / High Reward / High Probability Trading*

The key to producing short term income and long term wealth is having a strategy that anticipates market moves. Would you like to learn how to identify where a market is going to turn, before it turns. And, where market prices are going to go, before they go there with a very high degree of accuracy? Would you like to learn a simple rule based strategy that offers you low risk, high reward, and high probability trading and investing opportunities in any and all markets and time frames? If your answer is yes to these two questions then this three day course is for you.

### By attending this course, you will begin to learn:

- **How and why prices move in any market**
- **Exactly how and why retail traders and investors lose and institutions profit**
- **To identify where banks and institutions are buying and selling in markets**
- **Exactly where to enter the market with:**
  - Low risk buy or sell entry orders
  - Proper stop order placement (risk management)
  - Ideal profit targets for maximum gain
- **Rule based trading on any time frame**
- **The advantages of different asset classes (futures, forex, options) :**
  - Minimum account requirement
  - Use of leverage with low margin requirements
  - Markets available for around the clock trading
  - Markets with diverse opportunities
- **Personal Coaching sessions that will help you to:**
  - Determine which market is right for you
  - Develop a written trading/business plan
  - Be accountable to your plan
  - Avoid any future catastrophic losses
  - Focus on realistically achieving your financial goals
