SLIM YET POWERFUL ENOUGH FOR AN IMPRESSIVE MULTI-CHANNEL SURROUND SOUND EXPERIENCE

LG's SoundPlate™ can be easily installed and connected to TVs of many sizes, providing 4.1 channel surround sound with built-in dual subwoofers. It is designed to help you experience the ultimate in sound quality

SLIM DESIGN

Only 35mm in height, LG's slim SoundPlate™ is designed to sit beneath the television, saving space and bringing a clean, modern look to your home décor. This exceptionally sleek SoundPlate™ was made possible by applying dual neodymium magnets that are slim yet eight times more powerful than an ordinary magnet.

4.1 CHANNEL SURROUND

In spite of its modest dimensions, SoundPlate™ is equipped with a powerful 4.1 channel that incorporates dual built-in subwoofers. Stereophonic sounds instantly transform your home into a cinema theater. The 4.1 multi-channel surround system creates richer, deeper sounds that stand apart from competitive brands.

DUAL BUILT-IN SUBWOOFERS

Bass sound is produced by ultra slim built-in dual subwoofers that enrich and add depth to the low frequencies. This single slim plate eliminates the need for a bulky subwoofer to achieve a full sound system. What's more, two Aero-ducts on both sides of the product also create exceptional three-dimensional sound.
