User Manual

Vibrating Mini Sex Ball™

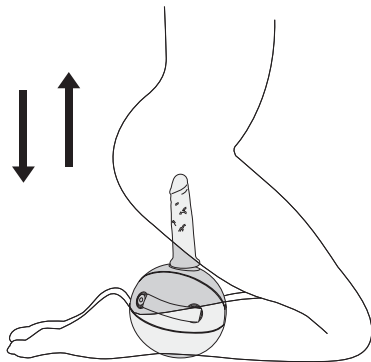

PD5685-29

Although Pipedream pleasure products have implied primary functions, we encourage our customers to explore our products and use them to their full potential. In other words – the use of this product is only limited to your imagination. Below are some ideas to help inspire you to make the most of your new pleasure product.

Your Mini Sex Ball can hold up to 200 lbs. and is ideal for use in a variety of positions. Inflate to your level of comfort – deflate a bit for a flatter bottom surface if desired. The realistic dong is firm and houses a powerful motor that provides strong multi-speed vibrations from tip to base.

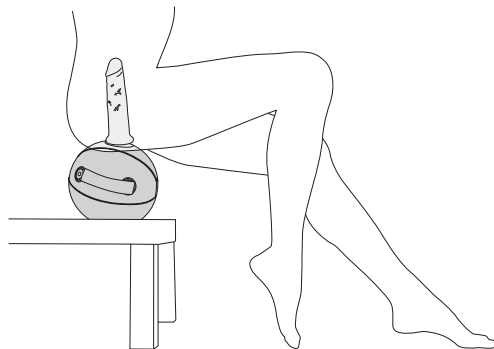

Bounce!

By kneeling and placing the Mini Sex Ball between your legs you are in a perfect position to bounce up and down on the realistic dong, and also have easy access to the multi-speed vibration controller. Your legs can help to keep the Mini Sex Ball in place while you move your body up and down.

Seated!

The versatile Mini Sex Ball can be placed on a level chair and can act as a sexy seat, ready for you to sit on again and again and again.

Handles!

You can lie back and use the convenient handles on each side of the Mini Sex Ball to guide the dong in and out. The handles allow you to experience closer and deeper penetration, according to your desires.
