

NU BRILLIANCE™

rejuvenate • restore • renew

Description

Exposure to today's harsh element, sun, environmental irritants and everyday stress can accelerate the signs of aging and slow down the natural renewal process.

This simple to use, convenient at-home system features an ergonomic wand with the choice of two diamond tips.

It is applied in uniform movements to exfoliate the dead skin cells. The vacuum stimulation removes them from the skin surface and promotes collagen production to aid in the skin's own natural rejuvenation process. The result ?

Visibly smoother, younger, healthier looking skin. Select from fine and regular diamond tips and 5 suction settings depending on your comfort level and skin sensitivity.

With continuous use, the appearance of fine lines and wrinkles diminish, acne scars and age spots are reduced, revealing more vibrant, younger looking skin. Safe for use on face, neck, hands, arms, legs and other sensitive areas.

Item# 30212

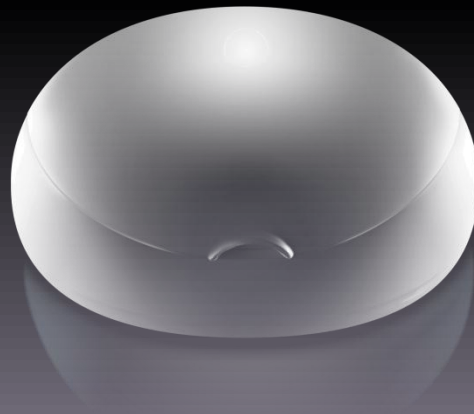

UPC Code

6 33235 30212 2

Features
