SKIN TRANSFORMATION BEGINS  
WITH

# EQUINOX

THE DIFFERENCE BETWEEN

LASER SKIN REJUVENATION

UTILIZING ADVANCED FRACTIONAL THERAPY

BRINGING HEALTHY SKIN TO LIGHT

## BRINGING HEALTHY SKIN TO LIGHT

A statement that truly embodies the entire EQUINOX experience. From verbalizing your skin transformation desires to your physicians, to the actual treatment session and beyond, patients continually praise the experience. In fact, to maintain and continually improve the skin, 95% of patients have set goals of having a fractional CO2 treatment at least once a year.

## EQUINOX TECHNOLOGY

The technology works by fractionating CO2 energy into microscopic beams of light. When these beams of light are “brushed” over the surface of the skin they will cause tiny disruptions that inspire the skin’s natural biosensor to begin a restoration process. Immediately after the treatment, beneath the surface of the skin, the intercellular spaces will begin synthesizing new collagen and elastin fibers. This new growth of the body’s own collagen will strengthen the skin’s underlying support structure and help the skin to retexture itself. With minimal downtime the skin will regain its youthful elasticity and new healthy skin completion will come to light.

## BEGIN YOUR TRANSFORMATION

**F**ine Lines, Deep Wrinkles, Acne Scars, Surgical Scars, Skin Discoloration, Sun Damaged Skin, Pre-Cancerous and Benign Lesions - All of these skin problems can be successfully treated at the **Bellagio Med Spa** with the EQUINOX Fractional CO2 Laser.

Begin your transformation today by scheduling a consultation to see if fractional therapy is right for you.

## THE MADONNA NON-SURGICAL EYE LIFT

**SHED 10 YEARS IN 10 MINUTES**

**SCHEDULE A CONSULTATION  
TODAY TO SEE IF THE  
MADONNA EYE LIFT IS  
RIGHT FOR YOU.**

With the State of the Art Equinox CO2 Laser we can take away dark rings and wrinkles around your eyes. Tightens upper and lower eyelid skin and helps alleviate a drooping eyelid and other aesthetic issue that lead to your eyes appearing older and tired. We can literally take years off your eyes in 15 minutes.

A topical numbing cream is applied to the eyelids and surrounding areas prior to treatment. Tiny light beams are emitted in columns to the targeted eyelids and areas around the eyes, while leaving surrounding tissue intact. The beams eradicate damaged collagen and elastic fibers so that fresh skin with renewed elasticity can grow back in its place. Because only a “fraction” of the skin is affected, healing is very quick and virtually painless.

The result is a non-surgical eye lift that will have you look younger and more radiant without surgery or needles.
