

portraits

your memorable experience begins...

with an in studio or at home visit where the design and feeling of the portrait is discussed. the location and timing of your portrait is decided, which I will pre scout to ensure the timing of your session is just right. an informative clothing consultation will also be provided.

once your photographic session has begun, any number of family and/or individual portrait requests will happily be accommodated.

approximately two weeks after your photographic session, we will sit down together and review your images. please invite any family or friends to help you decide. your selected portraits will be custom printed and framed according to your preferences.

creation fee:

\$250

includes up to 100 digital images on an online web gallery and the time it takes to get the great portrait.

proofs are included with print/frame purchases over \$600, or can be added to any package for \$250.
