

Saunatox infrared sauna

Soothe muscles, reduce toxins and improve skin tone!

relax

Our Saunatox infrared sauna uses far-infrared waves, a safe form of light therapy that deeply penetrates skin 2-3 inches deep into muscular tissue and ligaments to transform light energy to heat energy to improve blood circulation and promote healing and wellness to:

- Promote detoxification
- Relieve pain and stiffness
- Enhance immune system
- Reduce stress and fatigue
- Improve skin conditions
- Enhance metabolism and burn calories

Designed to melt away tension, soothe aching muscles, remove impurities and improve skin tone, Saunatox uses infrared technology to promote pain relief and enhance overall wellness.

Results are comparable to steam or massage treatments in just minutes. The Saunatox creates a warm and comfortable environment unlike unbearably hot traditional saunas.

After I turned 30 and being married a year, my health seemed to start slipping away. I became more complacent and started to gain weight. I knew I needed a change! I started using Saunatox and pairing it with Body products and nutritional supplements and immediately saw a difference in my weight and energy level."
