Dates Offered: March 17 & 18; April 14 & 15; May 12 & 13, 2012

Times Offered: Saturday 10-12am; Sunday 1-3pm

**Glass fusing** is the process of using a kiln's high heat to melt two or more pieces of glass together. The glass can then be heated again in the kiln to shape it into bowls, plates, votive holders, jewelry, ornaments...there are so many possibilities. Simple, fun and creative!!!

There is no experience needed, no glass cutting necessary. All skill levels and ages are welcome, we just ask that younger children (ages 4 to 10) have active, dedicated, parental involvement.

Once you are more comfortable with the fusing process, you can design your own project. This is where you just rent studio time and buy the glass and components that go into your design.

#### How it Works:

1. **You start with a 8"X10" piece of clear glass.**
2. **Create your design:** We have a wonderful variety of glass and colors to choose from, plus an idea books to inspire you. Once you have picked your design you then cut and arrange onto your glass base.
3. **We fire your piece:** You will come back in the amount of time specified for your pickup and be amazed and delighted by the by your beautiful glass artwork. We can also ship your pieces to you if you are not from this area.

**GREAT FOR:**

**Birthday Parties, Workplace Team Building Outings, Wedding Showers, Date Nights, Girls OR Guys Nights Out, Jack & Jill Parties, Christmas Presents, School Holiday Outings, Home Schooled Art Education Outings, etc.....**
